

# Residential & Commercial Video Pipe Inspections

At Underground Consulting, we provide honest, unbiased video inspections of all types of underground pipes such as residential and commercial sewer and drain lines. Since we do not perform any repair work, we can give you an honest evaluation of your property's sewer and drain lines, without trying to sell you repairs that you may not need. Often performed during home inspections, our camera inspections identify any potential problems with the main sewer lines that could lead to expensive repairs and maintenance down the road, such as roots & broken pipe.

At Underground Consulting, we provide:

- 100% Unbiased Sewer Pipe Inspection
- Due Diligence - Identify Sewer Problems Before Purchase
- Honest Expert Opinion - We Do Not Perform Any Repairs
- A Detailed, High Resolution Digital Video with PDF Report

Who we work for:

- Realtors & Brokers
- Building Maintenance Companies
- Commercial Property Owners
- Home Inspectors
- Home Buyers
